July 2013

## Dear Friends and Colleagues,

In a recent survey conducted by the Executive Committee of SECEC, Madrid was elected to host the 2013 SECEC-ESSE Closed Meeting on September 21st and 22nd by the votes of a vast majority of our members.

In 2009 you all experienced the capabilities of Madrid in hosting our congress showcasing its history, attractive atmosphere, hospitality and modern facilities. On this occasion, you will have the opportunity to visit Madrid again to attend this meeting right after the International Advanced Elbow Course, a very attractive scientific meeting for elbow surgeons.

The Executive Committee and the Programme Committee have set out to create a thought provoking yet balanced scientific programme for two days. This includes

- 36 podium presentations selected out of numerous studies submitted
- Two interactive sessions on clinical cases focusing on rotator cuff tears and proximal humeral fractures where a 'Jury of Experts' will discuss the different approaches to these problems.
- A new concept of 'Video Presentations' on innovative surgical techniques in shoulder and elbow surgery which promises to be very interesting.

This rich and attractive programme has been made possible thanks to the scientific contributions and active participation of the members of the society.

We hope that the scientific program and our hospitality will match your expectations and we can spend a few enjoyable days together.

We will look forward to seeing you amongst us in Madrid for the SECEC/ESSE Closed Meeting that will be held on 21-22 of September 2013
