

Dear SECEC Members

This year in order to open the scientific program to the SECEC members, it has been decided to give a way for SECEC members to apply for ICL chairmanship during the next SECEC congress which will be organized in MILANO in September 16-19 2015.

Until now the scientific program regarding Instructional Course Lecture (ICL) and Symposia is suggested by the Education Committee, which chooses Chairmen and program of the 9 ICL sessions and of the 2 symposia. The program is discussed and approved by the Executive Committee under the chairmanship of the President of the SECEC.

The Education Committee has suggested to open the ICL program to the SECEC members for ICL organization under some conditions. The application form available on the SECEC website must be completed by the ICL Chairman candidate and it will be submitted to the Education Committee. This form contains the following elements:

- 1 - Chairman** : Name and short CV. The Chairman of the ICL must be an Ordinary Member, he must have participated at least once in a podium or poster presentation, and must have been registered at 2 of the last 3 SECEC meetings.
- 2 - Team** : The team is built by the ICL Chairman. Each team member must be a SECEC member or apply to become a SECEC member during the congress at latest.
- 3 - Topic** : The title and topic of the ICL must be clearly defined regarding the topic (Elbow, shoulder, trauma, arthroplasty, etc)
- 4 - Summary** : A short summary is required regarding each part of the ICL related to the subject of each presenter of the ICL.
- 5 - MC questions** : 4 MC questions must be prepared for the qualification program.

The Education Committee remains in charge to build the ICL program which will take into consideration not only the ICL applications accepted after submission but as well other proposals of ICL chosen by the Education Committee. The final selection for the program is discussed in the Executive Committee, which decides under the chairmanship of the president about final ICL program. Therefore in future applications for the IC are welcome but the final selection has not to accept all of them.

If this new opening for the ICL is successful and works well, the SECEC will continue on this way and establish this procedure for the selection of the symposia for future SECEC congresses.

We hope that we will receive a lot of submissions and look forward to build the next SECEC Congress in MILANO all together in order to make it successful.

With warm regards

Laurent Lafosse
Chairman of the Education Committee
