

#### Dear SECEC Members,

We are very happy to inform you that during the next SECEC congress in Milano we will organise a new session every morning at the same time as the instructional courses: **the JSES session**.

The idea of this session is to present a successful paper published in the Journal of Shoulder & Elbow Surgery by one of its authors and analyzed according to EbM (evidence based medicine) guidelines by a moderator well known as specialist in the same topic. The aim is to have a very interactive session, focused on a specific topic and co-chaired by famous surgeons in order to establish the state of the art about this subject.

The three sessions will be:

#### **Thursday 17. September – 7.30**

Effect of anatomic bone grafting in post-traumatic recurrent anterior shoulder instability on glenoid morphology

Clinical and computed tomography-radiologic outcome after bony glenoid augmentation in recurrent anterior shoulder instability without significant bone loss

Author: Prof Herbert Resch - Moderator: Dr Gilles Walch

#### **Friday 18. September – 7.30**

Locking plate fixation of fractures of the proximal humerus: analysis of complications, revision strategies and outcome

Author: Prof Bernhard Jost – Moderator: Prof Ulrich Brunner

#### **Saturday 19. September – 7.30**

Propionibacterium acnes: an underestimated etiology in the pathogenesis of osteoarthritis

Author: Prof Ofer Levy - Moderator: Prof Alberto Schneeberger

We strongly hope that you will appreciate this new session and look forward to seeing you in Milano!

With my very best regards,

**Laurent Lafosse**  
*Chairman of the Education Committee*
