May 2015

Dear SECEC Members

We would like to invite you for Shoulder and Elbow Specialty Day during EFORT Congress in Prague (27.05.2015).

Our society has been asked again by EFORT to join the Specialty Session during EFORT Congress. We agreed to prepare two shoulder sessions having two basic ideas of future cooperation. First of all to share our Society's high standard of science and patient care, secondly to involve local national community of surgeons in organization of the session. Shoulder and Elbow Specialty Day organized by SECEC will include two sessions. One session will adhere to main congress theme of infections. Another will cover important and difficult problem of massive rotator cuff tears. Faculty invited for the session includes top international and Czech lecturers.

Both sessions will be presented on **Wednesday 27th of May 2015** in Prague.

In case that you plan to participate at the EFORT Congress we would kindly encourage you to join our session. You could still register for the Congress at <https://www.efort.org/prague2015/>.

Detailed program of the session can be found at <https://www.efort.org/prague2015/scientific-content/advanced-scientific-programme/details/?id={57474DF2-DFFD-4AA4-A90D-3D4A7E5857BE}>

or at the end of the letter

With best regards

Przemyslaw Lubiatowski
Chairman of SECEC
Eastern European Committee

Frank Gohlke
President SECEC
