**O**ur principal goal is to offer to all levels - from junior trainees to experts in the field - a range of practical information with regard to new techniques and ideas for our patients.

A large conference area will be set up for debates regarding arthroplasty where experienced specialists will be able to share their knowledge and examples of difficult cases.

This event will be a great occasion to network with your colleagues from all over the world.

Paris is the city of endless cultural and gastronomic attractions and we are sure that everyone will find time to explore them. We look forward to welcoming you to our great city !
